**Unauthorized Charges to Auxiliary Credit Card** -- If you find an unauthorized charge on your statement, call the Customer Service number on your credit card and advise them of the problem. Then fill out the "Customer Statement of Disputed Item" which appears on the back of every statement and mail it to the address listed on the form. By doing so you are protected under the Fair Credit Billing Act. This must be done within 60 days from the date of the statement. Federal law dictates this procedure for removal of the charge.

Unauthorized charges are a potential problem with all credit cards so check all credit card statements carefully for unauthorized charges.
